

Media

Can I upload audio files directly to FlixMe?

FlixMe supports both **video** and **audio** file formats. This flexibility allows creators of different types to use the least amount of effort while producing content. You don't have to spend time converting your audio to a video and it will still be playable on FlixMe.

This feature is especially helpful for **podcasters, musicians** and other **audio** creators.

Supported audio formats are **mp3, m4a, wav, aac**.

Note: Do not upload content you do not own or have permission to post. e.g. Songs by artists or anyone else's copyrighted content.

Please see [Supported Media File Formats](#) for more media info.
